

Metrodeck Ultra

Keynote

Easy handling

How did we make it so light?

We changed the frame to aluminium and - more importantly - changed the ply to poplar.

This is the system for those who find themselves setting the stage up on their own.

System

Metrodeck Ultra takes the versatility and simplicity of our original Metrodeck and refines it to produce a system that is robust, good-looking and easy to use.

Like all our systems Ultra builds flat, raked or tiered stages - with a choice of surface finishes.

Easy-grip handwheels hold the legs in place, connect the decks together and attach the handrails. This is genuine "no tool" assembly.

IDEAL FOR

- Stages which need to be set up by one person
- Events which need an extra special appearance
- Jobs where all equipment goes out in one vehicle

Technical

Standard specifications

Frame	Aluminium
Finish	Buffed
Top	18mm poplar ply
Acoustic layer	FR neoprene sheet
Legs	2" alloy tube
Weight (2mx1m)	..	32kg
Weight (1mx1m)	..	18kg
Loading	3.5kN/m ²
Safe unbraced	<1m (alloy legs)
Stacking depth	110mm
Connections	Easy-grip handwheels
