

Morgan trussing

Keynote

Effortless elegance

Morgan alloy trussing combines strength and good looks. Manufactured to exacting European standards, this tried-and-tested system offers a range of truss styles and sizes.

And all of this at an unbeatable price.

System

Every piece of Morgan trussing is made to European quality control standards.

We offer a polished finish as standard so that your truss not only performs the best but also looks the best. And with so many designers now making a feature of the truss it's more important than ever that your equipment looks the part.

We are always willing to discuss bespoke work with you - and to turn your ideas into reality.

IDEAL FOR

Customers with a need for quality bespoke work
Special structures which combine with our staging
People who want their truss to be a design feature
